

Make a dramatic design statement in warm, beautifully coloured stone that is ideal for poolsides, patios and gardens. Quarried in India on the Deccan plateau, our sandstone presents delicate nuances of colour and tactile qualities that enhance any interior or exterior living area.

Our three most popular colour groups are Grey, Beige and Mint. Whilst we know the colour ranges in which the stone is available, each delivery is subtly different and we recommend that you view samples of our stone before purchase and allow for delicate colour changes in your design - this is, after all, a completely natural product.

Sandstone is slip-resistant and offers superior compressive and flexural strength. It is extremely hard wearing yet its receptiveness to carving and shaping gives it broad flexibility of use. As a natural product, sandstone will improve with age.

The investment in natural stone repays high quality professional laying. We offer a full installation service and advice on the care of your sandstone.

Grey honed

Beige honed

Mint honed

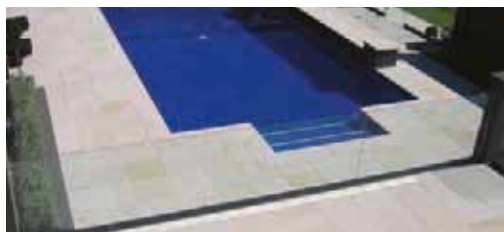

Grey riven

Beige riven

Mint riven

Pool surrounds

Encapsulated set

Pier capping

Bullnose straight step

Sawn edge

Yellow mint

Sandstone cobble

Rebated pool coping/step

Radial steps

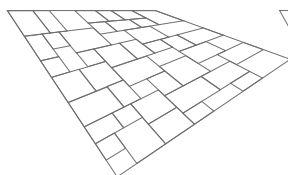

Please note that colours shown here are limited by the print process - we recommend that you view samples before purchasing.

### Sizes

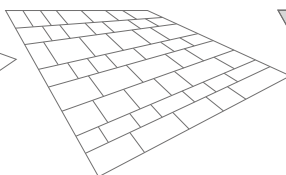

Standard paving      400x400mm    400x600mm    600x600mm    600x800mm  
(Paving can be cut to a specific thickness if required - standard 25 / 35mm)

Setts                      100x100x100mm                      100x100x80 / 100mm

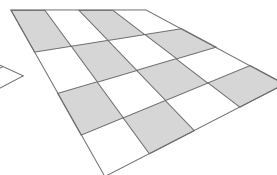

### Laying patterns

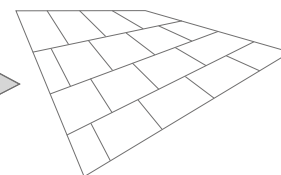

Random rectangle

Random coursed
