

As architectural statements an urn is a beautiful object with a time-honoured history. Striking garden ornaments provide the perfect finishing touch to a garden plan or draw the eye to a well-designed focal point, weathering gracefully to look as though they have always belonged there.

We have a wide range of high quality urns, vases and garden ornaments available that will complement your choice of natural stone environment. We can advise on choices for any design theme. Ranging in size from the vase urn, perfect for a niche, to the imposing Versailles with separately available plinth at 1.26m high there will be something to suit your design ideas.

In a range of sandstone colours and finishes, you will find an option that fits your vision. Sandstone comes in a huge variety of subtle colours, with and without veins of contrasting colour. Bespoke mouldings can be arranged if you have a special project in mind.

For modern design schemes, a range of geometric shapes are available in sandstone-textured finishes, along with pavers of granite and sandstone ideal for the construction of water features and rills. Talk to us about your specific requirements and we will be glad to show you our full range. We can provide design ideas for patio and outdoor dining areas which feature these geometric statement pieces.
